

NEW Caire Mouthwash

New and refreshing, fresh-mint menthol flavoured mouthwash is now available from Caire.

Regularly requested by passengers and airlines alike, we developed this product to compliment the Caire range of specialist in-flight amenities we provide worldwide. Adding this classic product broadens the Caire range, providing an even more complete range of amenities that passengers and airlines around the world use with total confidence. The confidence inspired by a product that is functional in both application and design. The widely recognized Caire brand continues its international recognition as well as being competitively priced. Caire Mouthwash can be used as a standalone product enhancing multi-branded amenity bags, or as a more complete brand offering for quality amenity kits.

Glass-like PETG has been moulded to form the eye-catching square

bottle providing strength, durability and design. Research shows passengers prefer a clear bottle for this product, so that's exactly what we provide. The cap prevents leakage with its internal cone seal design, also helping to provide hygienic dispensing. Our logo is 100% printed to ensure a luxurious and high quality presentation with no peeling or misshapen labels, along with clear, easy to read instructions and ingredients. Caire Mouthwash actively freshens breath, in addition to fighting tooth and gum disease and plaque formation in a handy 40ml bottle.

NEW Caire Antibacterial Handwash

Beautifully fragranced with genuine French perfume, Caire Green Tea, softening and moisturizing to hands, hypoallergenic, non-staining and leaves zero residue in bathrooms. A creamy pearl texture wraps itself like liquid velvet around your hands, gently yet effectively killing germs thereby actively reducing cross infections between passengers and Aircrew alike. The 240ml Caire

Antibacterial Hand Wash bottle is designed to fit most aircraft bathroom holders. Other sizes can be made to measure naturally. In addition to the classic bottle shape, the PE bottle itself is subtly translucent so replacement is readily seen. With its twist-loc, non spill, non leaking extended spout pump it provides drip free, hygienic, measured dispensing. The pump can be operated easily with one hand and is ideal for the smaller bathrooms found on aircraft using aircraft safe recyclable PE materials.

May we suggest combining it with the new Caire Green Tea range of amenities for consistent branding, fragrance and high quality throughout the passenger's entire flight experience.

We at Caire would like to extend our best wishes to you and your family, we wish you an enjoyable, safe Christmas and a prosperous New Year.

Thank you for your continued support and we look forward to helping to ensure satisfied passengers enjoy their flight even more with our personal care items, in the skies around the world. Thank you once again and we look forward to being of service in 2009.

Merry Christmas
